

List z Australii

W czerwcu 2023 r. otrzymaliśmy list ze szpitala w Australii the Port Macquarie Koala z podziękowaniami za nasze wsparcie i coroczną e-adopcję koali. Szpital zmienia nazwę na Koala Conservation Australia, rozszerza swoją działalność o nowy ważny projekt, którego celem jest ratowanie środowiska naturalnego koali.

Zachęcamy do zapoznania się ze szczegółami listu w wersji oryginalnej:

Thank you!

We could not achieve our vision of a healthy and thriving koala population without your help.

You probably noticed we've changed our name, we are still the Port Macquarie Koala Hospital but also much more! We rescue and rehabilitate koalas, manage koala food tree plantations and protect prime koala habitat.

We are also about to launch the *worlds-first Wild Koala Breeding Program* to help save our much-loved marsupials. It's a bold program, it has never been done before and it's too important to fail!

Everything we do is only possible thanks to generous donations and support from people like you!

At a glance
